Worksheet: Tissues

1. What is a tissue?
2. What is the specific function of the cardiac muscle?
3. Which component of blood helps to fight infection?
4. Group of cells, which is similar in structure and function are structured into_____
5. Name the tissue responsible for movement in our body
6. Vertical growth in plants takes place by –
7. Differentiate between parenchyma, collenchyma and sclerenchyma on the basis of their cell wall.
8. What is the role of epidermis in plants?
9. Which tissue makes up the husk of coconut?
10. What does a neuron look like?
11. What is the utility of tissues in multi-cellular organisms?
12. Give three features of cardiac muscles.
13. Differentiate between striated, unstriated and cardiac muscles on the basis of their structure and site/location in the body.
14. Name the tissues that are involved in the formation of membranes.
15. The tissue responsible for transport of food in plants is:
16. How are simple tissues different from complex tissues in plants?
17. Which of the following tissues has dead cells?
18. Name the following. (a) Tissue that forms the inner lining of our mouth. (b) Tissue that connects muscle to bone in humans. (c) Tissue that transports food in plants. (d) Tissue that stores fat in our body. (e) Connective tissue with a fluid matrix. (f) Tissue present in the brain
19. Which of these is not a type of muscle tissue?
20. The inner lining of the mouth is made of:
