## Worksheet: Tissues

1. What is the utility of tissues in multi-cellular organisms?
2. The Nodes of Ranvier are found in:
3. Which of these is not a type of muscle tissue?
4. The inner lining of the mouth is made of:
5. What does a neuron look like?
6. Give three features of cardiac muscles.
7. Name types of simple tissues.
8. Name the tissues that are involved in the formation of membranes.
9. How many types of elements together make up the xylem tissue? Name them.
10. What is the name of the tissues which helps in protection and support of the body?
11. What are the functions of areolar tissue?
12. Which of the following tissues has dead cells?
13. Differentiate between striated, unstriated and cardiac muscles on the basis of their structure and site/location in the body.
14. What is the specific function of the cardiac muscle?
15. How are simple tissues different from complex tissues in plants?
16. What is a tissue?
17. The tissue responsible for transport of food in plants is:
18. Identify the type of tissue in the following: skin, bark of tree, bone, lining of kidney tubule, vascular bundle.
19. Differentiate between parenchyma, collenchyma and sclerenchyma on the basis of their cell wall.
20. Which tissue makes up the husk of coconut?
